

# The all new Jetstick Label applicator

## **The all new high speed, inexpensive and versatile label applicator!**

Introducing the new Jetstick Industrial Applicator (JIA) designed for rapid barcode label application in industrial situations.

The JIA is an air-powered label applicator that mounts onto a barcode label printer such as the Intermec PM4i by way of a base plate. When the printer presents the printed barcode label, the JIA holds the label via suction and positions it for "blow" application onto the target package or carton.

### ***Incredible value and versatility!***

Economically priced and perfect for the industrial goods, processed foods, transport and logistics industry.

Instantly print and apply your labels onto almost any type of product or packaging.

### ***Perfect for:***

- Cardboard packaging
- Foodstuffs
- Shipping packing
- Clear-wrapped products
- Uneven surfaces
- Shrink-wrapped pallets

### ***Speed and accuracy:***

The Jetstick label applicator can apply labels up to 100mm x 150mm at a distance of 100mm at a speed of up to 60 labels per minute.

***Jetstick combines both speed and accuracy***

***The unique "jet-air" application will not harm your products***
